

John B. Gibson

Mr. Gibson is President and CEO of United Intelligence Corporation (UIC), a technology consulting company. Mr. Gibson brings more than 25 years of experience in developing, directing and implementing technology visions and strategies for mid-size to Fortune 500 companies. He has extensive experience in project management, software development, electrical/electronic engineering, Internet technology and product development.

Mr. Gibson directs and implements technology visions and business strategies for small, midsize and Fortune 500 companies. He leads project managers, business analysts, marketing specialists, engineers and software developers in exciting projects that innovate, increase sales, improve productivity and grow companies.

Mr. Gibson has held senior, executive, engineering and consulting positions with companies such as Bechtel Power Corporation, United Engineers, American Electric Power Corporation, Patton Design, Compusolve, Inc., Kaiser Aluminum, Ethyl Corporation, IBM, Compaq Computers, Eaton Corporation, Orange Coast Medical Ventures, AMP Incorporated, JobNet, Inc. and Allied Signal Corporation.

Mr. Gibson is also twice past Chair of the Orange County IEEE Section with 4,000 members, twice past Chair of the Eastern North Carolina IEEE Section with 3800 members, 2013 Chair of OC IEEE Corporate Relations Committee, member of the IEEE-USA R&D Policy Committee in Washington DC, member of the IEEE Robotics and Automation Society, member of the IEEE Power and Energy Society, and past board member of the Saddleback College Foundation. He is 2017 Chair of the IEEE San Fernando Valley Robotics and Automation Chapter.

Mr. Gibson has a Bachelor of Science Degree in Electrical Engineering from West Virginia University Institute of Technology and has completed post graduate studies in business management, technology, and advanced mathematics through Eastern Michigan University and Golden Gate University.
