

John B. Gibson

As a senior business and technology consultant and President, John Gibson brings extensive experience in information technology, internet marketing, competitive intelligence, and electrical/electronic engineering to United Intelligence Corporation clients.

Mr. Gibson directs and implements technology visions and business strategies for small, mid-size and Fortune 500 companies as well as government organizations. In the area of internet marketing, he has helped hundreds of companies significantly increase sales.

Prior to joining United Intelligence, Mr. Gibson held senior, executive, or consulting positions with companies such as Bechtel Power Corporation, United Engineers, American Electric Power Corporation, Compusolve, Inc., Kaiser Aluminum, Ethyl Corporation, IBM, Compaq Computers, Eaton Corporation, AMP Incorporated, JobNet, Inc. and Allied Signal Corporation. Mr. Gibson has also provided consulting services to Orange County Small Business Development Center (OCSBDC), California Manufacturing Technology Consulting (CMTC), the Institute for Women Entrepreneurs.

At United Intelligence Corporation Mr. Gibson assists companies in strategic positioning, internet marketing, web technologies, business process improvement, strategic planning, product design/prototyping, and intellectual property protection. Mr. Gibson is also twice Past Chairman, of the Orange County Institute of Electrical and Electronic Engineers (IEEE) Section with 4,000 members, Member of the IEEE Geoscience & Remote Sensing Society, member of the IEEE-USA R&D Policy Committee in Washington, DC and board member of the Saddleback College Foundation.

Mr. Gibson has a BSEE degree from West Virginia University Institute of Technology and has completed postgraduate studies in business management, technology, and advanced mathematics through Eastern Michigan University and Golden Gate University.
